

Türkiye Parazitoloji Dergisi

TURKISH JOURNAL OF PARASITOLOGY

EDITORIAL

We are releasing the last issue of this year with 15 manuscripts including 6 original researches, 1 review, 1 letter to editor, and 7 case reports.

In this issue, we include 3 original researches comprising toxoplasmosis investigations in protozoology, veterinary, and medicine. Moreover, we also include two manuscripts, one on pneumocystis and one on ectoparasites. As in every issue, case reports are chosen so as to include cases from various fields.

In order to review the manuscripts in more detail in our journal, new co-editors in the fields of Medicine and Veterinary Parasitology were designated and their names were given on the front pages of this issue. Newly submitted manuscripts will be reviewed through an editorial process which was established by the evaluation of reputable parasitology journals indexed in SCI.

With the hope that this issue of the Turkish Journal of Parasitology, one of the most important aspect of our scientific world and a tool that strengthen us, would contribute to our scientific works and accumulation.

Prof. Dr. Yusuf ÖZBEL
Chief Editor
